

Concepts Discretionary Investments (CDI)

Defensive Income Portfolio

28th February 2025

Objective: The portfolio invests in a blend of Equities (both UK and Global) which account for around 30% to 35% of the portfolio by weight, with the fund selection aiming to generate an attractive level of natural income together with capital growth. The remainder of the portfolio is held in Government and Corporate Fixed Interest Securities (again both UK and Overseas) and a balance in other assets, such as infrastructure, to add further diversification.

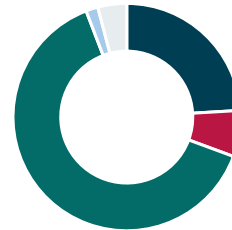

Target Market: This portfolio is suitable for investors with a time horizon of 5 years or more who are willing to accept Low to Medium levels of investment risk in return for the potential for participation in rising investment markets. This fund is designed for investors who can afford a modest loss of their investment.
