## Progressive Income Portfolio

28<sup>th</sup> February 2025

**Objective:** This portfolio invests in a blend of Equities (both UK and Global) which account for around 70% to 80% of the portfolio by weight, with the fund selection aiming to generate an attractive level of natural income together with capital growth. The balance is held in Government and Corporate Fixed Interest Securities (again both UK and Overseas) and other assets, such as infrastructure, to add further diversification.

**Target Market:** This portfolio is suitable for investors with a time horizon of 5 years or more who are willing to accept Medium to Medium/High levels of investment risk in return for the potential for participation in rising investment markets. This fund is designed for investors who can afford more than a modest loss of their investment.
